

June 12, 2020

2. Beginning Friday, June 12, and every Friday thereafter until we reach Phase 4 of re-opening, please provide a report to the Chairperson of the Committee on Human Services detailing the following:

- a. **The number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of DC government employees, contractors, and agents that work in the homeless services shelter system for the week. Please include all locations being used for quarantine, isolation and PEP-V.**

Below data represents June 3 – June 9

New positive cases	Losses of life
4	1

- b. **A daily census for the week of the number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of individuals in the homeless services shelter system, including unsheltered individuals. Please organize this data by specific placement.**

In Shelter Tested Positive (Cumulative)	3-Jun	4-Jun	5-Jun	6-Jun	7-Jun	8-Jun	9-Jun
801 East	47	47	47	47	48	48	48
CCNV	48	48	49	49	49	49	49
Harriet Tubman	11	11	11	11	11	11	11
New York Ave	92	92	92	92	92	92	93
Pat Handy	21	21	21	21	21	21	21
Unsheltered/other	21	21	21	21	21	22	22

Shelters with at least one positive case but fewer than ten positive cases: Adams Place, Calvary Transitional Housing, Casa Ruby, Covenant House, Days Inn Hotel, DC Doors, Greenleaf, Jordan House Crisis Beds, La Casa, Naylor Road Family Shelter, The Kennedy and Quality Inn

As of June 9, 17 individuals experiencing homelessness have lost their life. Because reporting deaths by location would violate privacy protections, the Department is reporting loss of life in the aggregate. Daily reporting of the total number of lives lost may be found on the Mayor’s coronavirus website: <https://coronavirus.dc.gov/page/human-services-agency-covid-19-case-data>

- c. A daily census for that week of individuals within the homeless services shelter system, by location. Please include all locations being used for quarantine, isolation, and PEP-V.

	6/3	6/4	6/5	6/6	6/7	6/8	6/9
801 East	245	260	244	241	249	236	240
New York Avenue	200	200	200	200	200	200	200
Adams Place	115	115	115	113	113	109	108
Harriet Tubman	134	129	132	136	132	134	130
St. Josephine Bakhita	19	20	19	20	20	19	19
Pat Handy	102	105	113	104	102	103	103
CCNV (women)	22	24	22	23	22	18	16
CCNV (men)	60	57	55	60	60	60	58
Arboretum	36	36	40	25	38	32	27
Capitol Skyline	52	54	54	51	41	43	54
Fairfield Inn	103	102	104	104	103	103	104
Holiday Inn	78	80	79	80	81	84	86

ISAQ PEP-V

- d. A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.

6/3	6/4	6/5	6/6	6/7	6/8	6/9
0	0	0	5	2	0	0

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV and Pat Handy; with a third machine to be placed at the second PEP-V site (Holiday Inn) in the coming weeks. With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

Between June 3 – June 9, specimens were collected from 35 individuals. Of these, DHS has received 6 results, all of which were negative.

DHS is only able to report on the subset of testing that is administered or ordered through our contracts. Therefore the number reported should not be interpreted as a full representation of access to testing among persons residing in shelter, ISAQ, or PEP-V sites.

3. By Friday June 12, please provide the following information to the Chairperson of the Committee on Human Services:

- a. **The novel 2019 coronavirus (SARS-CoV-2) testing protocol for individuals in the homeless services shelter system.**

Nurses located onsite at low-barrier shelters screen shelter residents and staff daily for symptoms understood to be associated with the novel 2019 coronavirus. The screened symptoms are consistent with the most up-to-date guidance from DC Health and Centers for Disease Control and Prevention¹ (CDC). Residents identified as exhibiting symptoms are moved to an ISAQ site. Once at ISAQ, residents are tested. Based on the result of each person's test, and whether symptomatic, persons remain at ISAQ until they are medically cleared by Unity Healthcare. If any of the tests administered at ISAQ are positive, contact tracing ensues and other shelter residents that have been in continuous close contact with the individual testing positive are also moved to an ISAQ site.

Concurrently, if one or more positive case is identified at a shelter, through testing at an ISAQ site, hospital or separate testing source, DHS, in partnership with DC Health and the Human Services Branch (HSB) of the Emergency Operations Center (EOC), will conduct a mass testing² of residents and staff at that shelter. After this initial mass testing event, a follow-up mass testing will be conducted every two weeks until no positive cases are identified.

¹ Symptoms of Coronavirus, Coronavirus Disease (COVID-19), Centers for Disease Control and Prevention. Available at: <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

² DHS uses the term "mass testing" instead of "universal testing" as there is always a possibility that certain shelter residents will refuse testing. Or who may not be available during the time that medical staff are onsite to collect specimens (e.g. resident may leave the shelter site for the day). Universal testing implies that everyone in the shelter is tested. Mass testing more accurately reflects the reality that some individuals are not tested. Additionally, all persons entering ISAQ are tested upon arrival.

This approach is consistent with recent research³ out of Harvard Medical School, which recommends routine testing in addition to screening persons for symptoms of COVID-19. It is also consistent with the CDC's recommendations for shelters⁴, which point to regular testing as an optimal strategy, as resources are available.

b. The novel 2019 coronavirus (SARS-CoV-2) testing protocol for government employees, contractors, and agents that work in the homeless services shelter system, including whether and under what conditions the District is testing asymptomatic individuals.

The Mayor's Order 2020-63 (April 15, 2020)⁵ designates staff working in shelters as essential health care workers. Essential workers are given priority for testing at the District's testing facilities. On April 17, DHS issued guidance (attached) to all DHS Homeless Service Providers on steps to take if a staff member has been exposed to COVID-19, including highlighting shelter staff's ability to be prioritized for testing and instructions for how to locate a testing site. This testing is available for all staff experiencing symptoms as well as asymptomatic staff that have been in close contact with a known positive case.

In addition to the testing offered by the District's testing facilities, DHS encourages all staff to get tested at one of the mass testing events that occur in low-barrier shelters (as referenced in response to Q3(a)).

c. The guidelines to determine referrals to PEP-V used by DHS, Unity Health, and any other partners involved.

Shelters and outreach workers within the District's homeless services system, as well as any hospital, may refer persons experiencing homelessness to PEP-V when the following criteria are met:

- 65 years and older; or
- Under 65 years old with underlying medical conditions, including:
 - Chronic lung disease or moderate to severe asthma
 - Serious heart conditions
 - Health conditions that reduce immunity, including undergoing or recovering from cancer treatment, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications
 - Severe obesity (body mass index [BMI] of 40 or higher)
 - Diabetes

³ "Testing for COVID-19 in Homeless Shelters," National Health Care for the Homeless Council, May 1, 2020. Available at: <https://nhchc.org/wp-content/uploads/2020/05/Testing-for-COVID-19-in-Homeless-Shelters.pdf>

⁴ "Assessment of SARS-CoV-2 Infection Prevalence in Homeless Shelters- Four U.S. Cities, March 17-April 15, 2020," Centers for Disease Control and Prevention, May 1, 2020. Available at: <https://www.cdc.gov/mmwr/volumes/69/wr/mm6917e1.htm>

⁵ Available at:

<https://coronavirus.dc.gov/sites/default/files/dc/sites/coronavirus/publication/attachments/MayorsOrder2020.063.pdf>

- Chronic kidney disease undergoing dialysis
- Liver disease

This criteria mirrors the CDC's guidance⁶ on the risk factors that place persons at higher risk for severe illness from COVID-19.

Unity's medical personnel review clinical information for all persons referred for PEP-V placement against PEP-V eligibility criteria. Persons determined by Unity to meet PEP-V eligibility criteria are offered a PEP-V placement.

d. The total number of individuals and the total number of families that have been turned away from the shelter system since the beginning of the public health emergency.

The Mayor declared a public health emergency on March 11, 2020. Daily reporting of turn-aways, as requested in Q2(d), begins on June 3, 2020. With this, from March 11 through June 2, 26 individuals were turned away from shelter due to capacity limitations. DHS does not turn away families due to capacity limitations.

The above data may not capture the full number as DHS works to improve its methodology for tracking when someone is turned away.

⁶ People Who Are at Higher Risk for Severe Illness, Coronavirus Disease (COVID-19), Centers for Disease Control and Prevention. Available at: <https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-at-higher-risk.html>

Guidance on Employees Exposed To COVID-19 OR Experiencing Symptoms of COVID-19

Last Updated: 4/17/2020

Guidance Overview:

This document offers guidance on how homeless service providers should respond when employees are showing symptoms consistent with COVID-19. This guidance also explains what providers should do when an employee has been identified as having been in close contact (see definition below) with another employee or a client who has been tested for COVID-19.

1. Who does this guidance apply to?

All DHS Homeless Service Providers

2. What is the definition of close contact?

According to the DC Department of Health, close contact is defined as:

1. Being within approximately 6 feet of a COVID-19 case for a prolonged period of time;
OR
2. Having direct contact with infectious secretions of a COVID-19 case (e.g. being coughed on).

Note: The definition of close contact does not include all individuals on the same floor or in the same building as a positive employee or client, unless they meet criteria (1) or (2), listed above. Close contact also does not include short encounters, such as passing a person in the hallway.

3. What should providers do if an employee has been in close contact with an individual who has tested positive for COVID-19?

If an employee has been in close contact with an individual who has tested positive, the employee should contact their employer to inform them of their possible exposure immediately.

If the employee is also experiencing ANY of the following symptoms: coughing, fever, or shortness of breath, the employee should **immediately** self-isolate at home and should contact their primary care physician to see if additional testing is necessary. Any staff who are asked to self-isolate should be given a letter providing further instructions. Providers can adapt the attached template from the DC Department of Health.

If the employee is not experiencing symptoms, the provider has discretion to decide whether the employee should be sent home or can continue work. If the employee continues work, the employee should be closely monitored, and should be **immediately** sent home if she/he develops ANY symptoms.

4. What should providers do if an employee demonstrates symptoms of COVID-19 while on-site?

If an employee demonstrates a fever and/or has new or worsening cough while on-site, the employee should be sent home **immediately**. The employee should be encouraged to call their primary health provider to see if additional testing is needed.

5. What should providers do if an employee has tested positive for COVID-19?

Once the provider is notified or becomes aware of an employee who received a positive test result for COVID-19, the provider should **immediately** take the following steps:

- **Confirm Dates.** Make note of the days the employee who tested positive worked and where they worked. Also make note of the day the employee started showing symptoms [fever, coughing, shortness of breath].
- **Identify others.** Identify clients or employees who had close contact with the employee who tested positive for COVID-19. Staff should identify individuals who had close contact with that person at any time while that person was symptomatic and two days before the person became symptomatic.
- **Notify DHS of positive cases by completing this [FORM](#).** **Please note:** Access to this information is highly restricted. This form should not be confused with the general staffing tracker, available [HERE](#), which tracks general staffing trends/needs.
- **Implement cleaning plan.** Rooms or areas previously occupied by the staff should receive a deep cleaning:
 - Please see [CDC Environmental Cleaning and Disinfection Recommendations](#) for guidance on how to clean the area.
 - Please refer to [EPA registered products](#) that can be used against COVID-19.

6. What should providers do if they experience staffing shortages?

Providers should notify DHS as soon as possible about any anticipated staffing shortages that may impact operations by contacting:

For DHS Providers: Contact your contract or grant administrator

For TCP Providers: Contact TCP

Providers should consider re-purposing staff as needed to cover staffing shortages, such as by asking case managers to provide operations support at the shelters.

7. When is it safe for employees who have tested positive for COVID-19 or have experienced COVID-19 symptoms to return to work?

Any employee who have had confirmed COVID-19 positive tests results must present their supervisor with written documentation from a healthcare professional stating that they are approved to return to work before returning to work.

If the employee was never tested for COVID-19 but has an alternate diagnosis (e.g., tested positive for influenza), criteria for return to work should be based on that diagnosis.

Persons with COVID-19 who have symptoms and were directed to care for themselves at home and were never tested may discontinue isolation and return to work under the following conditions:

- At least 3 days (72 hours) have passed *since recovery* - defined as resolution of fever without the use of fever-reducing medications; and
- Improvement in respiratory symptoms (e.g., cough, shortness of breath); and,
- At least 7 days have passed *since symptoms first appeared*.

8. How can essential workers stay safe?

Please see guidance from the DC Department of Health: *Coronavirus 2019 (COVID-19): [Guidance for Essential \(Non-Healthcare\) Workers on How to Stay Safe in the Workplace](#)*. This contains a list of recommendations that essential workers should follow to help protect themselves and other members of the community.

Please also see Mayor's Order 2020-063, *[Extensions of Public Emergency and Public Health Emergency and Measures to Protect Vulnerable Populations During the COVID-19 Public Health Emergency](#)*, issued April 15, 2020, that designates individuals who provide direct support services within congregate care settings (including shelters) as essential health care providers.

This designation allows those staff members to get access to testing if staff become symptomatic. Please see [HERE](#) for more information on how to access testing.

9. What other protective measures should providers take?

Consistent Mayor's Order 2020-063, *[Extensions of Public Emergency and Public Health Emergency and Measures to Protect Vulnerable Populations During the COVID-19 Public Health Emergency](#)*, issued April 15, 2020, we ask providers to take the following protective measures (if not already underway):

- Inform all employees in writing that they should not come to work if sick and of applicable paid leave provisions;
- Inform all employees in writing of social distancing protocols;
- If feasible, separate all employee workstations by at least six (6) feet or stagger employee shift times or duties to maintain social distance;
- Require all employees working on site to wear a mask or face covering;
- Ensure that all employees have consistent access to running water and soap; tissues and lined trash receptacles; store-bought alcohol-based hand sanitizer that contains at least sixty percent (60%) alcohol if permitted in the facility; and disinfectant spray or wipes;
- Implement the following practices to mitigate the risk of transmission within facilities and residences:
 - Any employee witnessing an individual exhibiting symptoms of COVID-19 shall notify the person in charge;

- Direct individuals exhibiting symptoms of COVID-19 to medical care or secure such care and determine or direct the individual to determine whether testing is available for COVID-19.

10. Where can I turn if I have additional questions?

For questions or additional information, please email dhs.covid19@dc.gov or visit coronavirus.dc.gov.

ISAQ PEP-V

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

6/24	6/25	6/26	6/27	6/28	6/29	6/30
0	0	0	2	2	0	2

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

Date	Total Specimens Collected	Positives	Negatives	Tests Pending
June 24-30	171	2	150	19
June 17-23	37	1	22	14
June 10-16	306	2	304	COMPLETE
June 3- 9	35	2	33	COMPLETE

Note: Results are subject to change. Includes updates with results pending from prior week(s).

DHS is only able to report on the subset of testing that is administered or ordered through our contracts. Therefore, the number reported should not be interpreted as a full representation of access to testing among persons residing in shelter, ISAQ, or PEP-V sites.

July 10, 2020

2. Beginning Friday, June 12, and every Friday thereafter until we reach Phase 4 of re-opening, please provide a report to the Chairperson of the Committee on Human Services detailing the following:

- a. **The number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of DC government employees, contractors, and agents that work in the homeless services shelter system for the week. Please include all locations being used for quarantine, isolation and PEP-V.**

Below data represents new cases from July 1 – July 7

Positive cases	Losses of life
0	0

- b. **A daily census for the week of the number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of individuals in the homeless services shelter system, including unsheltered individuals. Please organize this data by specific placement.**

In Shelter Tested Positive (Cumulative)	1-Jul	2-Jul	3-Jul	4-Jul	5-Jul	6-Jul	7-Jul

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

In the rare case the receipt of test results takes longer than 3-5 days, DHS investigates the delay with DC Health. At this time, and as noted in the chart below, DHS is unable to locate test results for 1% (9) of the total number of specimens collected since DHS began sharing this weekly report. These nine specimens are for eight unique individuals (one person had two specimens collected in June 2020). We expect to conclude our investigation in to these specific cases soon and update the ‘Tests Pending’ column accordingly.

Date	Total Specimens Collected	Positives	Negatives	Tests Pending
July 8-14	255	9	244	2
July 1-7	30	0	29	1
June 24-30	171	3	163	5
June 17-23	36	2	32	2
June 10-16	306	2	304	COMPLETE
June 3- 9	35	2	33	COMPLETE

Note: Results are subject to change. Includes updates with results pending from prior week(s).

DHS is only able to report on the subset of testing that is administered or ordered through our contracts. Therefore, the number reported should not be interpreted as a full representation of access to testing among persons residing in shelter, ISAQ, or PEP-V sites.

July 24, 2020

ISAQ PEP-V

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

7/15	7/16	7/17	7/18	7/19	7/20	7/21
1	0	2	6	7	4	0

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

In last week's report, DHS highlighted nine specimens, collected between June 3 - July 14, with delayed test results. Over this past week, DHS was able to resolve all but one outstanding test result for these specimens. Through our investigation, we learned that most of these cases were for samples that onsite medical staff requested to be collected for clients at an ISAQ site, but that were actually not collected because the client refused to provide a sample. DHS will continue our efforts to resolve the one remaining delayed test result, collected between July 1 – 7.

Date	Total Specimens Collected	Positives	Negatives	Tests Pending
July 15-21	37	0	8	29
July 8-14	253	9	244	COMPLETE
July 1-7	30	0	29	1
June 24-30	166	3	163	COMPLETE
June 17-23	34	5	29	COMPLETE
June 10-16	306	2	304	COMPLETE
June 3- 9	35	2	33	COMPLETE

Note: Results are subject to change. Includes updates with results pending from prior week(s).

DHS is only able to report on the subset of testing that is administered or ordered through our contracts. Therefore, the number reported should not be interpreted as a full representation of access to testing among persons residing in shelter, ISAQ, or PEP-V sites.

July 31, 2020

2. Beginning Friday, June 12, and every Friday thereafter until we reach Phase 4 of re-opening, please provide a report to the Chairperson of the Committee on Human Services detailing the following:

ISAQ PEP-V

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

7/29	7/30	7/31	8/1	8/2	8/3	8/4
0	0	0	5	5	0	0

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

Last week's report did not include 85 specimens collected at the mass testing event at Pat Handy on July 23, 2020. These specimens are accounted for in this week's report, bringing the total amount of specimens collected July 22 – July 28 to 368. (Total included in last week's report was 283.)

Date	Total Specimens Collected	Positives	Negatives	Tests Pending
July 29- Aug 4	29	1	22	6
July 22-28	368	4	356	8
July 15-21	37	0	36	1
July 8-14	253	9	244	COMPLETE
July 1-7	30	0	30	COMPLETE
June 24-30	166	3	163	COMPLETE
June 17-23	34	5	29	COMPLETE
June 10-16	306	2	304	COMPLETE
June 3- 9	35	2	33	COMPLETE

Note: Results are subject to change. Includes updates with results pending from prior week(s).

DHS is only able to report on the subset of testing that is administered or ordered through our contracts. Therefore, the number reported should not be interpreted as a full representation of access to testing among persons residing in shelter, ISAQ, or PEP-V sites.

August 14, 2020

2. Beginning Friday, June 12, and every Friday thereafter until we reach Phase 4 of re-opening, please provide a report to the Chairperson of the Committee on Human Services detailing the following:

- a. **The number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of DC government employees, contractors, and agents that work in the homeless services shelter system for the week. Please include all locations being used for quarantine, isolation and PEP-V.**

Below data represents new cases from August 5 – August 11

Positive cases	Losses of life
2	0

- b. **A daily census for the week of the number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of individuals in the homeless services shelter system, including unsheltered individuals. Please organize this data by specific placement.**

In Shelter Tested Positive (Cumulative)	5-Aug	6-Aug	7-Aug	8-Aug	9-Aug	10-Aug	11-Aug

ISAQ PEP-V

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

9/2	9/3	9/4	9/5	9/6	9/7	9/8
0	5	5	3	3	7	2

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for

DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

We have a small number of outstanding test results for specimens collected over the past four weeks. We will continue to work with DC Health to identify accordingly.

Date	Total Specimens Collected	Positives	Negatives	Tests Pending

October 16, 2020

2. Beginning Friday, June 12, and every Friday thereafter until we reach Phase 4 of re-opening, please provide a report to the Chairperson of the Committee on Human Services detailing the following:

- a. **The number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of DC government employees, contractors, and agents that work in the homeless services shelter system for the week. Please include all locations being used for quarantine, isolation and PEP-V.**

Below data represents new cases from October 7 – October 13

Positive cases	Losses of life
0	0

- b. **A daily census for the week of the number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of individuals in the homeless services shelter system, including unsheltered individuals. Please organize this data by specific placement.**

In Shelter Tested Positive (Cumulative)	7-Oct	8-Oct	9-Oct	10-Oct	11-Oct	12-Oct	13-Oct
801 East	49	49	49	49	49	49	49

Harriet Tubman	13	13	13	13	13	13	13
New York Ave	105	105	105	105	105	105	105
Pat Handy	21	21	21	21	21	21	21
Unsheltered/other	41	42	42	42	42	42	42

Shelters with at least one positive case but fewer than ten positive cases: Adams Place, Calvary Transitional Housing, Casa Ruby, Covenant House, Davidson House (CTFH), Days Inn Hotel, DC Doors, Greenleaf, Jordan House Crisis Beds, La Casa, Naylor Road Family Shelter, SOME Shalom House, The Kennedy and Quality Inn.

As of October 13, 21 individuals experiencing homelessness have lost their lives due to COVID-19. Because reporting deaths by location would violate privacy protections, the Department is reporting loss of life in the aggregate. Daily reporting of the total number of lives lost may be found on the Mayor’s coronavirus website: <https://coronavirus.dc.gov/page/human-services-agency-covid-19-case-data>

- c. **A daily census for that week of individuals within the homeless services shelter system, by location. Please include all locations being used for quarantine, isolation, and PEP-V.**

	10/7	10/8	10/9	10/10	10/11	10/12	10/13
801 East	240	240	240	240	240	240	240

Fairfield*	--	--	--	--	--	0	0

**As of October 12, 2020, DHS opened a third PEP-V location at Fairfield as well as initiated a double occupancy policy at all PEP-V locations.*

ISAQ PEP-V

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

10/7	10/8	10/9	10/10	10/11	10/12	10/13
0	4	0	6	0	2	0

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for

Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

Date	Total Specimens Collected	Positives	Negatives	Tests Pending

ISAQ PEP-V

- d. A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.

10/21	10/22	10/23	10/24	10/25	10/26	10/27
0	0	0	5	5	0	0

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

Beginning this week, we will share ‘Inconclusive Tests’ results as it provides a more complete representation of data overall. An inconclusive result can occur for a variety of reasons, including a sample being lost and never tested, an error occurring when the sample was collected or tested, or an insufficient amount of evidence to make a clear determination on whether SARS-CoV-2 is present at the time of testing. An inconclusive result does not determine if an individual is positive or negative. Given the low occurrence of these results in mass sampling events and operational challenges associated with retesting, DHS does not retest individuals who receive inconclusive test results.

Note: Results are subject to change. Includes updates with results pending from prior week(s).

DHS is only able to report on the subset of testing that is administered or ordered through our contracts. Therefore, the number reported should not be interpreted as a full representation of access to testing among persons residing in shelter, ISAQ, or PEP-V sites.

December 11, 2020

2. Beginning Friday, June 12, and every Friday thereafter until we reach Phase 4 of re-opening, please provide a report to the Chairperson of the Committee on Human Services detailing the following:

- a. **The number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of DC government employees, contractors, and agents that work in the homeless services shelter system for the week. Please include all locations being used for quarantine, isolation and PEP-V.**

Below data represents new cases from December 2 – December 8

Positive cases	Losses of life
9	0

- b. **A daily census for the week of the number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of individuals in the homeless services shelter system, including unsheltered individuals. Please organize this data by specific placement.**

In Shelter Tested Positive (Cumulative)	2-Dec	3-Dec	4-Dec	5-Dec	6-Dec	7-Dec	8-Dec
801 East	50	50	50	50	50	50	51

Pat Handy	21	21	21	21	21	21	21
Unsheltered/other	44	45	45	45	45	45	45

Shelters with at least one positive case but fewer than ten positive cases: Adams Place, Calvary Transitional Housing, Casa Ruby, Covenant House, Davidson House, DC Doors, Jordan House Crisis Beds, La Casa, Naylor Road Family Shelter, Madison Shelter, The Kennedy, The Triumph, The AYA, New Transitions, and Sherwood Recreation Center (Hypothermia).

As of December 8, 21 individuals experiencing homelessness have lost their lives due to COVID-19. Because reporting deaths by location would violate privacy protections, the Department is reporting loss of life in the aggregate. Daily reporting of the total number of lives lost may be found on the Mayor’s coronavirus website: <https://coronavirus.dc.gov/page/human-services-agency-covid-19-case-data>

- c. A daily census for that week of individuals within the homeless services shelter system, by location. Please include all locations being used for quarantine, isolation, and PEP-V.

Hypothermia

*Trinidad Rec opened as a Phase II Hypothermia site (as-needed basis) on December 8, 2020.

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

12/2	12/3	12/4	12/5	12/6	12/7	12/8
0	1	3	2	4	8	3

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

NOTE: In accordance with the District’s right to shelter during hypothermia season, turn-aways reported through March 31 represent walk up turn-aways from shelters that had reached COVID capacity limits. In these cases, customers are offered transport to another shelter with beds available.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCONV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

January 15, 2021

2. Beginning Friday, June 12, and every Friday thereafter until we reach Phase 4 of re-opening, please provide a report to the Chairperson of the Committee on Human Services detailing the following:

- a. **The number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of DC government employees, contractors, and agents that work in the homeless services shelter system for the week. Please include all locations being used for quarantine, isolation and PEP-V.**

Below data represents new cases from January 6 – January 12

Positive cases	Losses of life
15	0

- b. **A daily census for the week of the number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of individuals in the homeless services shelter system, including unsheltered individuals. Please organize this data by specific placement.**

In Shelter Tested Positive (Cumulative)	6-Jan	7-Jan	8-Jan	9-Jan	10-Jan	11-Jan	12-Jan
801 East	62	62	62	62	62	62	62

Unsheltered/other	46	46	46	46	46	46	46

Shelters with at least one positive case but fewer than ten positive cases: Calvary Transitional Housing, Casa Ruby, Covenant House, Davidson House, DC Doors, Jordan House Crisis Beds, La Casa, Naylor Road Family Shelter, Madison Shelter, New Transitions, Olaiya’s Cradle, Passages, St. Josephine Bakhita, The Kennedy, The Triumph, The AYA, Sherwood Recreation Center (Hypothermia) and Trinidad Recreation Center (Hypothermia).

As of January 12, 23 individuals experiencing homelessness have lost their lives due to COVID-19. Because reporting deaths by location would violate privacy protections, the Department is reporting loss of life in the aggregate. Daily reporting of the total number of lives lost may be found on the Mayor’s coronavirus website: <https://coronavirus.dc.gov/page/human-services-agency-covid-19-case-data>

- c. **A daily census for that week of individuals within the homeless services shelter system, by location. Please include all locations being used for quarantine, isolation, and PEP-V.**

ISAQ PEP-V Hypothermia

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

1/6	1/7	1/8	1/9	1/10	1/11	1/12
0	2	2	2	1	2	0

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

NOTE: In accordance with the District’s right to shelter during hypothermia season, turn-aways reported through March 31 represent walk up turn-aways from shelters that had reached COVID capacity limits. In these cases, customers are offered transport to another shelter with beds available.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

Date	Total Specimens Collected	Positives	Negatives	Inconclusive Tests	Pending Tests
Jan 6 – Jan 12	573	13	437	2	121

Note: Results are subject to change. Includes updates with results pending from prior week(s).

DHS is only able to report on the subset of testing that is administered or ordered through our contracts. Therefore, the number reported should not be interpreted as a full representation of access to testing among persons residing in shelter, ISAQ, or PEP-V sites.

February 5, 2021

2. Beginning Friday, June 12, and every Friday thereafter until we reach Phase 4 of re-opening, please provide a report to the Chairperson of the Committee on Human Services detailing the following:

- a. **The number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of DC government employees, contractors, and agents that work in the homeless services shelter system for the week. Please include all locations being used for quarantine, isolation and PEP-V.**

Below data represents new cases from January 27 – February 2

Positive cases	Losses of life
6	0

- b. **A daily census for the week of the number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of individuals in the homeless services shelter system, including unsheltered individuals. Please organize this data by specific placement.**

In Shelter Tested Positive (Cumulative)	27-Jan	28-Jan	29-Jan	30-Jan	31-Jan	1-Feb	2-Feb
801 East	63	63	63	63	63	63	63

Hypothermia

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

1/27	1/28	1/29	1/30	1/31	2/1	2/2
3	4	0	0	2	4	1

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

NOTE: In accordance with the District’s right to shelter during hypothermia season, turn-aways reported through March 31 represent walk up turn-aways from shelters that had reached COVID capacity limits. In these cases, customers are offered transport to another shelter with beds available.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

Date	Total Specimens Collected	Positives	Negatives	Inconclusive Tests	Pending Tests
Jan 27 – Feb 2	415	6	340	5	64
Jan 20 - 26	236	8	220	8	COMPLETE
Jan 13 - 19	274	12	250	12	COMPLETE

Jan 6 – Jan 12	575	14	529	32	COMPLETE
----------------	-----	----	-----	----	----------

Note: Results are subject to change. Includes updates with results pending from prior week(s).

DHS is only able to report on the subset of testing that is administered or ordered through our contracts. Therefore, the number reported should not be interpreted as a full representation of access to testing among persons residing in shelter, ISAQ, or PEP-V sites.

February 12, 2021

2. Beginning Friday, June 12, and every Friday thereafter until we reach Phase 4 of re-opening, please provide a report to the Chairperson of the Committee on Human Services detailing the following:

- a. **The number of novel 2019 coronavirus (SARS-CoV-2) positive cases and the number of novel 2019 coronavirus (SARS-CoV-2)-related deaths of DC government employees, contractors, and agents that work in the homeless services shelter system for the week. Please include all locations being used for quarantine, isolation and PEP-V.**

ISAQ PEP-V Hypothermia

*Temporary relocation occurred for facility maintenance issues.

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

2/24	2/25	2/26	2/27	2/28	3/1	3/2
1	0	0	1	1	0	0

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

NOTE: In accordance with the District’s right to shelter during hypothermia season, turn-aways reported through March 31 represent walk up turn-aways from shelters that had reached COVID capacity limits. In these cases, customers are offered transport to another shelter with beds available.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

Hypothermia

- d. **A daily census for that week of the number of “turn-aways” from the homeless services shelter system. Please specify whether the turn-away is from the individual or family shelter system.**

3/24	3/25	3/26	3/27	3/28	3/29	3/30
0	0	0	0	3	0	1

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

NOTE: In accordance with the District’s right to shelter during hypothermia season, turn-aways reported through March 31 represent walk up turn-aways from shelters that had reached COVID capacity limits. In these cases, customers are offered transport to another shelter with beds available.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.

The above numbers represent individuals only. DHS does not turn away families due to capacity limitations.

- e. **The number of novel 2019 coronavirus (SARS-CoV-2) tests administered during the week and the rate of positivity.**

DHS administers tests for individuals residing in certain congregate settings, such as low-barrier shelter, as well as Isolation and Quarantine (ISAQ) and the Pandemic Emergency Program for Highly Vulnerable Populations (PEP-V). Abbott ID NOW rapid test machines are placed and operating at CCNV, Pat Handy and the second PEP-V site (Holiday Inn). With the exception of specimens analyzed with an Abbott ID NOW rapid test machine, it normally takes 3-5 days for DHS to receive lab results. Thus, the number of specimens collected will rarely equal the number of results received from the evaluation of these specimens.
